

## CONTENTS OF VOLUME 1

- Altermatt, H. A., Simpson, F. J., and Neish, A. C.** The fermentation of D-allose and D-glucose by *Aerobacter aerogenes*, 473.
- Atkinson, R. G.** See Vaisey, E. B., 574.
- Avery, R. J. and Blank, F.** On the chemical composition of the cell walls of the *Actinomycetales* and its relation to their systematic position, 140.
- Bailey, W. R. and Laidley, R.** A method for separating mixed cultures of Salmonellae, 288.
- Baker, G.** See Chase, F. E., 45.
- Bakerspigel, A.** See Dowding, E. S., 68.
- Barron, A. L. and Reed, G. B.** *Clostridium botulinum* Type E toxin and toxoid, 108.
- Baxter, R. M. and Gibbons, N. E.** Effects of homologous and heterologous antisera on the glycerol dehydrogenases of halophilic and non-halophilic bacteria, 262.
- Bayley, S. T.** See Katznelson, H., 22; Smithies, W. R., 605.
- Bidwell, R. G. S., Vittorio, P. V., Krotkov, G., and Reed, G. B.** The effect of penicillin on CO<sub>2</sub> production and the uptake of C<sup>14</sup>-labelled glucose and glutamine by *Staphylococcus aureus*, 634.
- Bird, F. T. and Whalen, M. M.** Stages in the development of two insect viruses, 170.
- Blackwood, A. C.** See Moore, W. B., 198; Dalby, A. C., 733.
- Blank, F.** On the cell walls of dimorphic fungi causing systemic infections, 1.  
See also Avery, R. J., 140.
- Boothroyd, B.** See Haskins, R. H., 749.
- Bradley, R. H. E. and Ganong, R. Y.** Evidence that potato virus Y is carried near the tip of the stylets of the aphid vector *Myzus persicae* (Sulz.), 775.  
Some effects of formaldehyde on potato virus Y *in vitro*, and ability of aphids to transmit the virus when their stylets are treated with formaldehyde, 783.
- Brown, H. J. and Gibbons, N. E.** The effect of magnesium, potassium, and iron on the growth and morphology of red halophilic bacteria, 486.
- Buchner, B. K., Reid, D. B. W., and Dempster, G.** The antibody response in man to a quadrivalent influenza virus vaccine, 249.
- Burr, M. M., Campbell, M. E., Morgan, J. F., and Nagler, F. P.** Studies on the propagation of influenza and mumps viruses in tissue culture with chemically-defined media, 158.
- Burton, M. O.** See Lochhead, A. G., 319.
- Calvin, J.** See Miller, J. J., 560.
- Campbell, M. E.** See Burr, M. M., 158.
- Carpenter, J. A.** See Vaisey, E. B., 574.
- Chase, F. E. and Baker, G.** A comparison of microbial activity in an Ontario forest soil under pine, hemlock, and maple cover, 45.
- Chinn, S. H. F.** An antibiotic-producing bacterium of the genus *Pseudomonas*, 118.
- Clark, D. S. and Wallace, R. H.** *Candida malicola*, nov. sp., isolated from apples, 275.
- Clark, D. S., Wallace, R. H., and David, J. J.** Yeasts occurring on apples and in apple cider, 145.
- Clunie, J. C.** See Konowalchuk, J., 182.
- Colasito, D. J., Koffler, H., Tetrault, P. A., and Reitz, H. C.** Assay for circulin based on the release of cellular constituents, 685.
- Crossley, V., Simpson, M., and Finlayson, M.** *Escherichia coli* strains associated with gastroenteritis in infants with special reference to a hospital outbreak due to *E. coli* type 111:B4, 277.
- Dalby, A. and Blackwood, A. C.** Oxidation of sugars by an enzyme preparation from *Aerobacter aerogenes*, 733.
- David, J. J.** See Clark, D. S., 145.
- Dempster, G.** See Buchner, B. K., 249.
- Dowding, E. S. and Bakerspigel, A.** The migrating nucleus, 68.

- Finlayson, M. See Crossley, V., 277.
- Fischer, J. B. See Labzoffsky, N. A., 520.
- Fischer, J. B. and Labzoffsky, N. A. Preparation of complement fixing antigen from *Cryptococcus neoformans*. Preliminary report, 451.
- Fitz-James, P. See Hannay, C. L., 694.
- Fitz-James, P. C. The phosphorus fractions of *Bacillus cereus* and *Bacillus megaterium*. I. A comparison of spores and vegetative cells, 502.  
The phosphorus fractions of *Bacillus cereus* and *Bacillus megaterium*. II. A correlation of the chemical with the cytological changes occurring during spore germination, 525.
- Frappier, A. See Sonea, S., 597.
- French, R. C. and Siminovitch, L. The action of T2 bacteriophage ghosts on *Escherichia coli* B, 757.
- Ganong, R. Y. See Bradley, R. H. E., 775, 783.
- Gibbons, N. E. See Baxter, R. M., 262; Brown, H. J., 486; McDonald, I. J., 365; Smithies, W. R., 605, 614.
- Gilligan, W. and Reese, E. T. Evidence for multiple components in microbial cellulases, 90.
- Gözy, B. See Kátó, L., 622.
- Gözy, B. and Kátó, L. Studies on the effects of phagocytic stimulation on microbial disease. I. Action of some derivatives of the bicyclo [0.3.5] decapentaene skeleton on endothelial cells of skin vessels, 455.  
Studies on the effects of phagocytic stimulation on microbial disease. III. The influence of antihistamines and 1,4-dimethyl-7-isopropylazulene on experimental tuberculosis—preliminary experiments, 461.
- Graham, A. F. See Siminovitch, L., 721.
- Grainger, R. M. See Labzoffsky, N. A., 715.
- Gray, P. H. H. and Rogers, C. G. Effects of benzenhexachloride on soil microorganisms. IV. Benzenhexachloride-resistant bacteria from virgin soils, 312.
- Hannay, C. L. and Fitz-James, P. The protein crystals of *Bacillus thuringiensis* Berliner, 694.
- Haskins, R. H., Thorn, J. A., and Boothroyd, B. Biochemistry of the Ustilaginales. XI. Metabolic products of *Ustilago zeae* in submerged culture, 749.
- Hawirko, R. Z. The hemagglutination reaction to BCG and vole bacillus vaccinations, 79.
- Hinton, N. A. See Konowalchuk, J., 175, 182.
- Hinton, N. A., Konowalchuk, J., and Reed, G. B. Antibacterial action of a reaction product of cysteine and iron. III. *In vivo* action on pneumococcus infection in mice, 211.
- Hochster, R. M. Inhibition of xylose isomerase of *Pseudomonas hydrophila* by sulphhydryl reagents and the effect of glutathione, 589.  
The formation of phosphorylated sugars from D-xylose by extracts of *Pseudomonas hydrophila*, 346.
- Hungate, R. E. See Mylroie, R. L., 55.
- Isa, J. M. See Savage, A., 291.
- Jackson, A. W. and Pasiaka, A. E. Arginine degradation by *Micrococcus pyogenes* var. *aureus*, 339.
- Jaeger, R. F. and Myers, D. M. *Listeria monocytogenes*—A study of two strains isolated from human listeriosis, 12.
- James, N. Yellow chromogenic bacteria on wheat. I. Quantitative studies, 271.  
Yellow chromogenic bacteria on wheat. II. Determinative studies, 479.
- Jordan, D. C. Observations on the enzymatic degradation and conversion of certain L- and D-amino acids by an effective strain of *Rhizobium meliloti*, 743.
- Jordan, D. C. and San Clemente, C. L. The utilization of peptides and L- and D-amino acids by effective and ineffective strains of *Rhizobium meliloti*, 659.  
The utilization of purines, pyrimidines, and inorganic nitrogenous compounds by effective and ineffective strains of *Rhizobium meliloti*, 668.
- Kátó, L. See Gözy, B., 455, 461.
- Kátó, L. and Gözy, B. Studies on the effects of phagocytic stimulation on microbial disease. IV. The influence of 1,4-dimethyl-7-isopropylazulene with and without dihydrostreptomycin on experimental tuberculosis in guinea pigs, 622.

- Katznelson, H. See Peterson, E. A., 190.
- Katznelson, H., Sutton, M. D., and Bayley, S. T. The use of bacteriophage of *Xanthomonas phaseoli* in detecting infection in beans, with observations on its growth and morphology, 22.
- Kemp, W. G. See Weintraub, M., 549.
- Koffler, H. See Colasito, D. J., 685.
- Konowalchuk, J. See Hinton, N. A., 211.
- Konowalchuk, J., Clunie, J. C., Hinton, N. A., and Reed, G. B. Antibacterial action of a reaction product of cysteine and iron. II. Preparation and properties of the substance, 182.
- Konowalchuk, J., Hinton, N. A., and Reed, G. B. Antibacterial action of a reaction product of cysteine and iron. I. Development of the substance in media for *Mycobacterium tuberculosis*, 175.
- Krotkov, G. See Bidwell, R. G. S., 634.
- Labzoffsky, N. A. Experiences with a new antigen for a complement fixation test in tuberculosis, 794.  
See also Fischer, J. B., 451.
- Labzoffsky, N. A. and Fischer, J. B. A simple method of preparing an antigen from *Histoplasma capsulatum* for use in the complement fixation test, 520.
- Labzoffsky, N. A., Grainger, R. M., and Ross, W. G. Survival of equine encephalomyelitis virus (Eastern type) for eleven years at 4° C. in the presence of cysteine hydrochloride, 715.
- Laidley, R. See Bailey, W. R., 288.
- Lentz, C. P. See Steel, R., 150, 299.
- Lewin, R. A. See Mintz, R. H., 65.
